

TASK 4

DIGITAL LITERACY

EMAIL 1: EXTENSION REQUEST

Subject: Extension Request: Digital Literacy Project – Baves P

Dear Professor,

I hope this email finds you well.

I am writing to respectfully request an extension for the Digital Literacy project, which is currently due on **30/03/2026**.

Over the coming week, I have a significant overlap of academic deadlines, including three major mid-term assessments and a lab certification. Due to this concentrated workload, I am concerned that I will not be able to complete the Digital Literacy tasks – specifically the portfolio and repository setup – to the high standard required for this course.

To ensure I can provide a thorough and professional submission, would it be possible to extend my deadline to **04/04/2026**

I apologize for any inconvenience this request may cause and greatly appreciate your time and consideration.

Best regards,

Baves P

EMAIL 2: SUMMER INTERNSHIP INQUIRY

Subject: Inquiry- Summer Technical Internship | AI & Data Automation

Dear Hiring Manager,

I hope you are having a productive week.

I am writing to express my interest in a Summer 2026 internship within your **Software Engineering and AI Solutions** department. As a BTech candidate specializing in CSE (AIML), I have spent the past year focusing on the intersection of automated data tracking and predictive logic.

Recently, I developed a **command-line personal utility tool in Python** designed for real-time data management and categorization. This project allowed me to refine my skills in structured programming and algorithmic efficiency – competencies I am now eager to apply to the large-scale automation challenges handled by your team.

I have long admired your organization's approach to **integrating intelligent systems into everyday workflows**. My background in Python, coupled with a deep academic interest in First-Order Logic and search strategies, aligns well with the technical rigor of your development pipeline.

My resume is attached for your review, and I have also included a link to my professional portfolio. I would welcome the opportunity to discuss how my technical background and problem-solving mindset can support your upcoming summer initiatives.

Thank you for your time and for considering my application.

Best regards,

Bavesh P
